

# Residential Conversion of a Grade II Listed Building

## Client

Private Developer

## Description

A competition winning design by JF Cowper in 1923, Heathcroft is a complex of nine linked blocks of flats, arranged around a formally landscaped courtyard and is Grade II listed.

## Innovations & Added Value

Proposal provides additional residential accommodation within the attic storerooms above the blocks. The guiding principles for the design are to minimise the impact the scheme will have on the appearance but ensure compliance with current regulations and enable the work to progress with minimal disruption to the residents.
