

# Squires Mount

## Client

Private Housing

## Description

Tangram designed and managed the refurbishment of a Grade II listed terrace house adjacent to a Grade I listed mansion. The external building fabric was repaired with roof trusses and floor joists replaced. The scheme involved complex negotiations with Camden Council and the National Trust.

## Innovations & Added Value

The ground floor was cleared and reconfigured to remove restrictive partitions. A rear extension and roof terrace were created with structural glass and beams, transforming the kitchen and dining area below.
