

Blamsters Hamlet, Halstead

Client

Mrs Pauline Hennessey

Description

The project involves the development of residential care facilities for people with learning difficulties and also those with physical and/ or sensory deprivation. The site is located in open farmland adjacent to a Grade II listed farmhouse and in close proximity to the town of Halstead.

Innovations & Added Value

The change in levels across the site present exciting and challenging opportunities to bury the buildings in the ground by so doing protect the views of the listed building. Tangram are developing a design response to these challenges which takes account of the varying abilities of the residents and exploits the possibility of creating a built form with excellent sustainability credentials.
