

Cellular Pathology Laboratory, Princess Alexandra

Client

The Princess Alexandra Hospital NHS Trust

Description

The laboratory is the centre for pathology testing for several hospitals in the local area. The service moved from poor facilities bringing with them an archive of microscope slides now housed within the building surrounded by state of the art laboratories.

Innovations & Added Value

The materials and architectural detailing follow our earlier building, The Jenny Ackroyd Centre at that hospital, at the request of the client Trust, being the start of comprehensive redevelopment of the site.
