

Jenny Ackroyd Centre, Princess Alexandra Hospital

Client

The Princess Alexandra Hospital NHS Trust

Description

This was a fast track project at the start of the national diagnostic and treatment centre programme. The hospital has considerable expansion plans and proposes to continue to redevelop the site in the materials and style of this building.

Innovations & Added Value

The project included wards, operating theatres and pre-assessment and admission suites. Prefabrication techniques were employed in highly detailed areas, e.g. patient shower rooms and theatre suites. The fully-tiled ensuite were fabricated complete in Germany.
