

Client

Barking, Havering and Redbridge University Hospitals NHS Trust

Description

Phased refurbishment and improvements of the Accident and Emergency department, including the Urgent Care Centre, Children’s A&E and Extended Imaging.

The novel existing hospital plan constrains layout options and this challenge produces some innovative solutions.

Innovations & Added Value

The design adopts ‘The Big Front Door’ principle from latest Department of Health guidance. Layouts provide for careful phasing to minimise disruption to the department during construction.
