

MRI Suite St George's Hospital, Tooting

Client

St George's Healthcare NHS Trust

Description

The project consists of the reconfiguration of existing accommodations to enable a Philips Achieva 3.0 Tesla Scanner to be installed together with associated facilities such as Reception and Waiting Area, Transfer and Anaesthetic Bay and Control and Reporting Rooms.

Innovations & Added Value

As the Trust were developing within an existing PFI facility it was necessary to seek agreement from the consultant's team working on behalf of the PFI provider as well as satisfying the requirements of the clinicians and radiographers.
