

Ultrasound Reception & Waiting Area, St Georges

Client

St Georges Healthcare NHS Trust

Description

Tangram were commissioned to refurbish the Ultrasound Reception & Waiting Area and CT Scanning Control Room in the Radiology Department of St Georges Hospital, Tooting.

Innovations & Added Value

Tangram worked with Marilyn McKibbin, an artist using acrylic as 2 and 3 dimensional art. The design reflects the functional nature of the brief but also adds a visual impact. The user group complemented the design team for creating an environment which lifted the spirits of staff and patients and made it a space in which it is a joy to work and be treated.
