

Community Hospital, Cheshunt

Client

South East Herts Primary Care Trust

Description

The Trust devised a concept drawing together several services in a non-acute setting successfully integrating facilities and levels of provision in one place. Minor Injuries unit and X-ray department, which also serves outpatient areas, are provided as well as other OPD services such as Physiotherapy, Podiatry, general consultations and a Day Surgery Theatre.

Innovations & Added Value

The building compliments the vernacular architecture of the local community and has the ability to change layout internally through careful design and specification of the interior.
